

TopServ Digital — BrandFormance® Website Messaging & Copy Framework

Purpose of This Document

This document is the strategic foundation for the new TopServ Digital website.

It should guide:

- Website architecture
- UX/UI
- Copywriting
- Page hierarchy
- Calls to action
- Visual storytelling
- Video placement
- Case studies
- Service-page positioning
- SEO content
- Conversion strategy

The new TopServ website should **not** feel like a traditional digital marketing agency website.

We are not building another website that says:

We do SEO, PPC, websites, social media, and digital marketing.

Those are tools.

Our methodology is **BrandFormance®**.

The entire website should communicate one central idea:

Stop Chasing Leads. Start Building a Brand Customers Choose.

TopServ Digital is the **Home of BrandFormance®**—our methodology for combining brand building with performance marketing to help home service companies become the obvious choice in their markets.

1. THE CATEGORY WE WANT TO OWN

TopServ should not compete solely inside the category of:

Digital Marketing Agency

We want to establish and own:

BrandFormance®

Brand + Performance

Traditional performance marketing focuses primarily on capturing existing demand.

Brand marketing creates familiarity, trust, preference, and future demand.

BrandFormance® brings them together.

The website should repeatedly teach visitors:

Performance captures demand. Brand creates demand. BrandFormance® does both.

This distinction should become one of the central narratives throughout the website.

2. THE ENEMY: LEAD DEPENDENCY

Every powerful positioning strategy needs a problem it exists to solve.

Our enemy is not Google.

It is not PPC.

It is not SEO.

It is not LSAs.

TopServ uses these tools.

The enemy is **dependency**.

Many home service businesses have built marketing systems where growth depends almost entirely on continuously purchasing demand from platforms they do not control.

Stop paying Google?

The leads stop.

Stop running PPC?

The leads stop.

Lose rankings?

The phone slows down.

Increase competition?

Acquisition costs increase.

This is what Jonathan describes as:

Digital Heroin

The business becomes addicted to continuously purchasing the next lead.

The website should challenge this model without implying that performance marketing is unnecessary.

Our argument is:

Performance marketing is powerful. Dependency on performance marketing is dangerous.

BrandFormance® is designed to reduce that dependency by building recognition, familiarity, trust, and preference while simultaneously capturing demand.

3. THE CORE PROBLEM

The central problem we solve is bigger than lead generation.

Most Contractors Don't Have a Lead Problem. They Have a Brand Problem.

A contractor can:

- Rank on Google
- Run PPC
- Buy LSAs
- Have hundreds of reviews
- Build a great website
- Generate traffic

...and still lose the customer.

Why?

Because:

Being Found Isn't the Same as Being Chosen.

The modern customer is exposed to multiple companies.

When several companies appear credible, familiarity becomes a major advantage.

Our job is therefore not simply to help contractors appear when customers search.

Our job is to help contractors become the company customers already:

Know. Trust. Remember. Prefer.

Before the search ever happens.

4. THE TRANSFORMATION

The website should tell a clear before-and-after story.

BEFORE BRANDFORMANCE®

The contractor is:

- Chasing leads
- Fighting over keywords
- Dependent on Google
- Paying increasing acquisition costs
- Competing primarily on price
- Difficult to distinguish from competitors
- Invisible until someone needs the service
- Constantly trying to generate the next transaction

AFTER BRANDFORMANCE®

The contractor becomes:

- Recognizable
- Familiar
- Trusted
- Memorable
- Differentiated
- Visible throughout the market
- Searched for by name
- Less dependent on any single acquisition channel
- Better positioned to convert existing demand
- Capable of creating future demand

The ultimate transformation is:

From Another Option → To The Obvious Choice™

Do not use a trademark symbol unless approved.

5. THE BRANDFORMANCE® PHILOSOPHY

BrandFormance® should be presented as a business-growth methodology—not simply an advertising tactic.

It should teach contractors to think differently about marketing.

Traditional Model

Need leads → Buy attention → Capture demand → Close job → Repeat

BrandFormance® Model

Create Attention → Build Familiarity → Establish Trust → Create Preference → Capture Demand → Convert → Reinforce the Brand

The objective is to influence the customer **before, during, and after** the buying decision.

6. THE BRANDFORMANCE® FLYWHEEL

The website should visualize BrandFormance® as a connected system.

Recommended conceptual stages:

1. POSITION

Clarify:

- Who you are
- Who you serve
- What makes you different
- Why customers should remember you
- What your brand stands for

2. BUILD

Create the assets required to support the brand:

- Website
- Messaging
- Video
- Photography
- Reviews
- Reputation
- Social presence
- Conversion infrastructure

3. CREATE DEMAND

Build awareness and familiarity through:

- Video
- Meta
- YouTube
- Streaming/OTT
- Social media
- Email
- Community presence
- Content
- Retargeting

4. CAPTURE DEMAND

Be present when customers become ready to buy through:

- Google
- SEO
- Local SEO
- Google Business Profile
- PPC
- LSAs
- Location/service pages
- Search visibility
- AI search visibility

5. CONVERT

Turn attention into revenue through:

- Strong offers
- Landing pages

- Reputation
- Trust signals
- Calls
- Forms
- Booking
- CSR training
- Sales processes

6. MEASURE & OPTIMIZE

Measure the complete system:

- Brand awareness
- Branded search
- Traffic
- Engagement
- Leads
- Conversion rates
- Customer acquisition cost
- Revenue
- Channel performance
- Market penetration

Then use the data to improve the system.

The website should make it visually clear that these pieces work together.

BrandFormance® is the operating system.

The marketing channels are components inside it.

7. FIVE-MILE-FAMOUS

One of the primary outcomes of BrandFormance® is helping contractors become:

Five-Mile-Famous

A home service company does not need everyone in America to know its name.

It needs the right homeowners in the right service areas to recognize it.

The website should explain the concept simply:

You don't need to become world famous. You need to become famous where you make money.

The goal is market familiarity.

When the homeowner eventually:

- Needs an AC replaced
- Has a plumbing emergency
- Needs an electrician
- Needs a new roof
- Has a garage door problem

...the company should already feel familiar.

The search should confirm the decision—not introduce the company for the first time.

8. OWNED VS. RENTED ATTENTION

This should become another recurring educational concept.

Rented Attention

Examples:

- PPC clicks
- LSAs
- Lead aggregators
- Third-party platforms
- Algorithm-dependent traffic

Rented attention can be valuable.

But when the payment stops, much of the attention disappears.

Owned Brand Equity

Examples:

- Name recognition
- Brand searches
- Audience
- Customer database
- Reputation
- Video library
- Content library
- Community presence
- Customer loyalty
- Familiarity
- Word of mouth

The BrandFormance® strategy should continuously convert rented attention into longer-lasting brand equity.

9. WEBSITE POSITIONING HIERARCHY

Every major page should reinforce this hierarchy:

Level 1 — CATEGORY

BrandFormance®

What is it?

Why does it exist?

Why is the traditional approach incomplete?

Level 2 — OUTCOME

Become the Obvious Choice

What changes for the contractor?

Level 3 — MARKET STRATEGY

Become Five-Mile-Famous

How do we create familiarity and preference?

Level 4 — SYSTEM

The BrandFormance® Method

How does TopServ execute it?

Level 5 — CAPABILITIES

Only now do we discuss:

- Branding
- Websites
- SEO
- Local SEO
- PPC
- LSAs
- Meta
- YouTube
- Video
- OTT
- AI
- Email
- Reputation
- Funnels
- Content
- Tracking

This hierarchy is extremely important.

We do not want the visitor's first impression to be:

TopServ sells SEO and PPC.

We want:

TopServ created a different approach to home service marketing called BrandFormance®.

10. PROPOSED WEBSITE ARCHITECTURE

HOME

Purpose:

Introduce the problem, category, methodology, proof, and transformation.

Suggested narrative:

Hero

Stop Chasing Leads. Start Building a Brand Customers Choose.

Supporting copy:

TopServ Digital is the Home of BrandFormance®—combining brand building with performance marketing to help home service companies become the obvious choice in their markets.

Primary CTA:

Discover BrandFormance®

Secondary CTA:

Get Your Brand Score

Problem

Being Found Isn't Enough Anymore.

Explain why rankings, PPC, LSAs, and leads alone cannot create market dominance.

Category

Meet BrandFormance®

Explain Brand + Performance.

Use a simple visual:

BRAND

Creates Demand

-

PERFORMANCE

Captures Demand

=

BRANDFORMANCE®

Builds Market Dominance

Transformation

From Invisible to Five-Mile-Famous

Explain local market familiarity.

Method

Introduce the BrandFormance® system visually.

Position → Build → Create Demand → Capture Demand → Convert → Optimize

Proof

BrandFormance® in Action

Show:

- Client stories
- Market penetration
- Brand search growth
- Maps visibility
- Video reach
- Lead results
- Revenue outcomes
- Testimonials

Do not show vanity metrics without context.

Founder

Meet the Creator of BrandFormance®

Jonathan Bannister

Founder & CEO, TopServ Digital
Creator of BrandFormance®
Bestselling Author
Keynote Speaker
Host of Home Service Hustle

Connect Jonathan's thought leadership to TopServ without making the company website solely about Jonathan.

CTA

How Strong Is Your Brand?

Invite the visitor to complete the Brand Equity Analysis / Brand Score.

11. BRANDFORMANCE® PAGE

This should become one of the most important pages on the website.

Recommended URL concept:

[/brandformance](#)

This page should answer:

1. What is BrandFormance®?
2. Why was it created?
3. What's wrong with traditional digital marketing?
4. What is the difference between brand and performance?
5. How does BrandFormance® work?
6. What are its core components?
7. What business outcomes does it create?
8. Who is it for?
9. What does implementation look like?

10. How can a contractor get started?

This page should become the definitive online resource for the term **BrandFormance®**.

12. THE METHOD PAGE

Recommended concept:

[/brandformance-method](#)

This page explains the actual methodology.

Show the stages visually.

Each stage should have:

- Objective
- Problem solved
- Activities
- Deliverables
- Metrics
- Expected outcome

This is where prospects begin understanding that BrandFormance® is an actual operating methodology—not merely a marketing slogan.

13. SOLUTIONS PAGES

Do not build traditional disconnected service pages.

Every solution page should connect back to BrandFormance®.

Instead of:

SEO Services

Frame it as:

Capture Existing Demand With Search

Then explain how SEO fits inside BrandFormance®.

Instead of:

Facebook Ads

Frame it as:

Create Demand With Paid Social

Instead of:

Video Production

Frame it as:

Build Trust at Scale With Video

Instead of:

Website Design

Frame it as:

Turn Attention Into Customers

The service still needs to be clearly identified for SEO and user understanding, but the positioning should always connect the tactic to the larger system.

14. INDUSTRY PAGES

Create dedicated pages for:

- HVAC
- Plumbing
- Electrical
- Roofing
- Garage doors
- Pest control
- Landscaping
- Other priority trades

Do not simply change the trade name on identical pages.

Each industry page should address:

- Competitive dynamics
- Customer buying behavior
- Seasonality
- Typical marketing dependency
- Brand challenges
- Relevant channels
- Examples
- Case studies
- How BrandFormance® applies specifically to that trade

Example:

BrandFormance® for HVAC Companies

Not simply:

HVAC Digital Marketing Services

15. CASE STUDIES

Case studies should prove the BrandFormance® thesis.

Avoid:

We increased traffic by 43%.

Instead tell the transformation story.

Situation

What was happening before TopServ?

Brand Problem

Why wasn't the company being chosen?

BrandFormance® Strategy

What did we change?

Demand Creation

How did we build awareness?

Demand Capture

How did we capture existing intent?

Business Outcome

What changed?

Brand Outcome

What evidence shows stronger market recognition?

Case studies should show both:

Brand Lift + Performance Lift

Whenever the available data supports both.

16. ABOUT TOPSERV

The About page should not begin with company history.

Begin with the belief.

We Believe Home Service Companies Deserve Better Than Another Lead-Generation Agency.

Then explain why TopServ exists.

Company history supports the story after the positioning has been established.

Core identity:

TopServ Digital is the Home of BrandFormance®.

17. ABOUT JONATHAN

Jonathan's page should establish:

Jonathan Bannister

Creator of BrandFormance®

Supporting authority:

- Founder & CEO of TopServ Digital
- Two-time bestselling author
- Author of *F#ck Digital Marketing*
- Keynote speaker
- Host of the Home Service Hustle Podcast
- Entrepreneur
- Former law enforcement officer

This page should connect:

Jonathan → BrandFormance® → TopServ

It should support:

- Speaking

- Podcast appearances
 - Books
 - Media
 - Thought leadership
 - Social profiles
-

18. FUCK DIGITAL MARKETING BOOK PAGE

The book should become part of the BrandFormance® ecosystem.

Position it as:

The Manifesto Behind BrandFormance®

The book explains the problem.

BrandFormance® provides the alternative.

TopServ implements it.

This creates an intentional ecosystem:

Book → Idea → Methodology → Agency

19. HOME SERVICE HUSTLE

Position the podcast as another part of the TopServ/BrandFormance® media ecosystem.

It demonstrates the belief that:

Contractors Should Think Like Media Companies.

The podcast should increase:

- Authority
 - Trust
 - Industry relationships
 - Content production
 - Brand awareness
-

20. PRIMARY CONVERSION PATH

Avoid having 12 competing CTAs.

The primary website conversion path should be:

Step 1

Discover BrandFormance®

Low friction.

Education.

Step 2

Get Your Brand Score

Self-assessment / diagnostic.

Step 3

Get Your BrandFormance® Assessment

Higher intent.

Step 4

Build Your BrandFormance® Plan

Sales opportunity.

This creates a natural progression from:

Curiosity → Education → Diagnosis → Strategy → Engagement

21. BRAND SCORE / BRAND EQUITY ANALYSIS

This should become a major lead-generation asset.

Potential categories:

- Brand Recognition
- Search Presence
- Reputation
- Video Presence
- Social Presence
- Market Visibility
- Website Authority
- Conversion Experience
- Paid Visibility
- AI Visibility
- Customer Experience
- Competitive Position

Output:

BrandFormance® Score

The score should identify where the company sits between:

Invisible → Visible → Familiar → Trusted → Preferred → Obvious Choice

This diagnostic could eventually become proprietary TopServ intellectual property.

22. COPYWRITING RULES

TopServ copy should be:

- Bold
- Clear
- Conversational
- Educational
- Confident
- Contrarian when justified
- Outcome-focused
- Home-service specific

Avoid:

- Marketing jargon
- Corporate language
- Generic agency clichés
- Unnecessary superlatives
- Buzzwords without explanation
- Empty claims
- Overly long paragraphs
- Talking about TopServ before discussing the customer

Avoid headlines such as:

- Unlock Your Potential
- Elevate Your Business
- Transform Your Digital Presence
- Innovative Digital Solutions
- Results-Driven Marketing
- Your Partner for Growth
- Full-Service Digital Marketing

Those could belong to thousands of agencies.

TopServ copy should be recognizable even if the logo disappeared.

23. SIGNATURE LANGUAGE

Use recurring phrases strategically:

BrandFormance®

The Home of BrandFormance®

Brand + Performance

Create Demand. Capture Demand.

Stop Chasing Leads. Start Building a Brand.

Being Found Isn't the Same as Being Chosen.

Become the Obvious Choice.

Become Five-Mile-Famous.

Performance Captures Demand. Brand Creates Demand.

Own Attention. Don't Just Rent It.

Customers Buy the Company They Know Before the Company They Find.

Build a Brand People Remember.

Do not cram every phrase onto every page.

Repetition should build memory without becoming robotic.

24. VISUAL DIRECTION

The site should visually communicate the BrandFormance® methodology.

Do not rely only on stock photography and blocks of copy.

Build visual explanations for:

Brand + Performance

Two systems combining.

Create Demand / Capture Demand

Show both sides working simultaneously.

BrandFormance® Flywheel

Visualize the methodology.

Five-Mile-Famous

Visualize local market saturation around the contractor's service area.

Rented vs. Owned Attention

Show the difference between purchasing individual leads and building a compounding brand asset.

Customer Journey

Show:

Unaware → Exposed → Familiar → Trust → Search → Recognition → Choice → Customer → Advocate

Market Presence

Show the homeowner encountering the contractor across:

- Facebook
- Instagram
- YouTube
- TikTok
- Google
- Streaming TV
- Email
- Search
- Maps
- AI platforms

The visual design itself should help explain BrandFormance®.

25. SEO + AI SEARCH STRATEGY

We should optimize the website for traditional search while simultaneously building authority around our proprietary terminology.

Create authoritative content around:

- BrandFormance®
- BrandFormance® Marketing

- BrandFormance® for home services
- Home service branding
- HVAC branding
- Plumbing branding
- Home service marketing
- Brand vs. performance marketing
- Demand creation vs. demand capture
- Home service video marketing
- AI search for contractors
- Five-mile-famous
- Home service brand equity

Our objective is not to abandon SEO.

It is to use SEO as one component of BrandFormance® while establishing TopServ and Jonathan as authoritative sources around the category.

26. CONTENT HUB

The website should function like a media company.

Create a central content ecosystem containing:

- Articles
- Videos
- Podcast episodes
- BrandFormance® education
- Case studies
- Research
- Guides
- Frameworks
- Tools
- Book content

Whenever possible, one core idea should exist across:

Video → Article → Short Form → Podcast → Email → Social → Search

This reinforces our belief that modern contractors should operate like media companies.

TopServ should demonstrate the strategy it teaches.

27. TRUST & PROOF

Throughout the website, include:

- Client testimonials
- Video testimonials
- Case studies
- Before/after data
- Screenshots
- Maps
- Market-share evidence
- Client logos
- Speaking footage
- Podcast clips
- Book credibility
- Industry partnerships
- Team expertise

Every major claim should have proof nearby whenever possible.

We should **show**, not merely tell.

28. WHAT THE WEBSITE SHOULD NEVER BECOME

Do not allow the website to become:

A Menu of Services

SEO | PPC | Websites | Social | Video

That makes us interchangeable.

A Lead-Generation Pitch

“We’ll get your phone ringing.”

Thousands of agencies make that promise.

A Jonathan Bannister Fan Site

Jonathan is important to the story, but TopServ must become an institution capable of growing beyond one personality.

A BrandFormance® Buzzword Site

BrandFormance® must have substance.

Visitors should be able to understand:

- The problem
- The philosophy
- The methodology
- The implementation
- The measurement
- The results

An Anti-Digital-Marketing Website

We are not saying digital marketing doesn't work.

We are saying:

Digital marketing works better when people already know who you are.

29. THE STORY EVERY PAGE SHOULD TELL

At a high level, every important page should follow this narrative:

1. PROBLEM

What is the contractor struggling with?

2. FALSE ASSUMPTION

What has the industry taught them to believe?

3. INSIGHT

What are they missing?

4. BRANDFORMANCE® PRINCIPLE

How do brand and performance solve the problem together?

5. PROOF

Why should they believe us?

6. PLAN

What does TopServ actually do?

7. OUTCOME

What changes for their business?

8. CTA

What should they do next?

30. THE ULTIMATE POSITIONING TEST

Before approving any major page, ask:

Question 1

Could another home service marketing agency put its logo on this page without substantially changing the copy?

If yes, the page is too generic.

Question 2

Does this page teach something valuable about BrandFormance®?

If no, strengthen the connection.

Question 3

Does the visitor understand why BrandFormance® is different from ordinary digital marketing?

If no, clarify the distinction.

Question 4

Does the page explain an outcome instead of simply listing services?

If no, rewrite it.

Question 5

Is there evidence supporting the major claims?

If no, identify what proof needs to be added.

Question 6

Does the visitor know what to do next?

If no, strengthen the CTA.

THE NORTH STAR

Everything on the new TopServ Digital website should reinforce this narrative:

The old way:

Generate leads. Chase clicks. Fight over rankings. Rent attention. Repeat.

The BrandFormance® way:

Build awareness. Create familiarity. Establish trust. Generate demand. Capture intent. Convert customers. Build brand equity. Repeat.

We don't want to simply help contractors generate another lead.

We want to help them build a company people already know before they need them.

A company they recognize when they see it.

A company they remember when the need arises.

A company they search for by name.

A company they trust.

A company they choose.

That's BrandFormance®.

And TopServ Digital is the Home of BrandFormance®.
